

*Connecting radios all over the world*

## Remote control your Barrett 4050 MF/HF radio with VoIP audio.

*Virtual Control Head of the Barrett 4050HF*

Mimer SoftRadio is a system to remote-control two-way radios over LAN, WAN or the Internet. The operator use a standard Windows PC and standard audio accessories. **"-It feels like sitting in front of the radio"**

Each operator can handle many radios, and each radio can be remote controlled by many operators.

The remote-control option for the Barrett 4050 radios includes not only audio and PTT functions but also channel change and many other of the menu functions.

The system allows for mixing of radio types at the same operator, so that also other radios regardless if they are analogue or digital like Marine band, Air band, DMR or Tetra can be controlled. Also, phones and intercoms can be operated from the same PC.

Optionally all audio can be recorded, and calls can be cross patched between radio systems.
