

Connecting radios all over the world

Airband Radio with VoIP audio Remote control your Trig TY91/92

Virtual Control Heads of Trig TY91

Trig radio unit

Mimer SoftRadio is a system to remote control two way radios over LAN, WAN or the Internet. The operator use a standard Windows PC and standard audio accessories.

Each operator can handle many radios and each radio can be remote controlled by many operators.

SoftRadio is also available for many other radio types and systems

The remote control option for the Airband Radios from Trig includes not only audio and PTT functions but also channel change and squelch setting.

The system allows for mixing of radio types at the same operator, so that also other analogue radios or digital radios as DMR or Tetra can be controlled. Also phones and intercoms can be operated from the same PC.

Mimer SoftRadio with four different radios connected

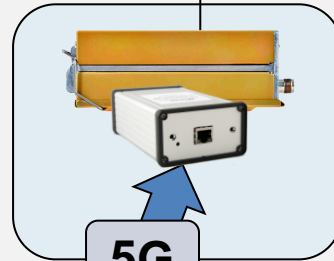

Optionally all audio can be recorded and calls can be cross patched between radio systems.
