Cable Kit 3015
Interface 3009/14

Mimer SoftLine – Sepura SRM/SRG/SCG

Remote functionality

This cable kit will together with the Mimer Network Interface give remote control of the radio. Together with interface 3009/13 at the operator a standard Sepura control head and microphone can be used for the remote control.

Radio programming

No special programming is needed.
You might need to check that the Interface port is activated for control head use.

There is no need for the option "Line In / Line Out".

Cable Kit

The red wire on the cable kit shall be connected to +12V and the black to ground.

Connection

The radio shall be powered through this cable kit instead of the standard power cable to avoid hum and noise.

Use the "Interface 1" connection on the radio. Called "Console port" on SCG22.
The interface 2 (Console port 2) connector can also be used in parallel for a standard Sepura control head.
