

## Cable Kit 3328 & 3328/02 Interface 3009/60

### Mimer SoftRadio for Trig TY91 Airband radio

#### Remote functionality

This cable kit will together with the Mimer Network Interface give remote control of the radio's audio and PTT functions.

It will also, through a Virtual Control Head, give the possibility to change channel and adjust the squelch.

#### Radio programming

No special programming is needed in the radio.

#### Cable Kit

The red and black wires shall be connected to **12VDC**, red is positive.

The network interface consumes max 0,3A.

*Note that the TY91 can be run on either 12VDC or 24VDC. But the older network interfaces are **12V only**. From serial number 10 000 and upwards. The interface works also on 24VDC.*

*Virtual Control Head for  
Trig TY91*

*Network Interface connected to the radio*

### Version /02

The 3328/02 cable kit has an extra connector where a standard Trig Control Head can be connected in parallel with SoftRadio.

### Audio Volume Settings when using Trig Control Head

Changing the volume settings on the control head also effect the audio path to the Mimer Network Interface.

Set the volume control knob on the control head to zero, (full anti clockwise) and leave it there.

### Virtual Control Head functions
